(54) REPRODUCING DEVICE AND METHOD, RECORDING MEDIUM, AND PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To quickly shift a reproduction point by a prescribed time width ΔT in response to one operation of a user.

SOLUTION: Whether or not a format permits special reproduction is discriminated in a step S11, and whether or not a time meets a timing when the special reproduction is limited is discriminated in a step S12.

Reproduction point shift processing is executed in a step S13. In the case that it is discriminated the format permits no special reproduction in the step S11 or the time meets no timing when the special reproduction is limited in the step S12, whether or not the format permits searching for a designated time is discriminated in a step S14. Whether or not the time meets a timing when the time designated searching is limited is discriminated in a step S15. When a present reproduction point meeting the timing limiting the time designation searching is discriminated, the processing continues to the step S13.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
